

Business Plan: Humsang Business (humsang.com)

1. Executive Summary

Humsang Business is a division of **Headway Manage Business**, positioned as a **real-time inventory and supply chain platform** with a **Direct-to-Home (D2H) model**.

It combines:

- **B2B Partner Management** (sales managers, wholesalers, retailers).
- **Business Listing Marketplace** (find suppliers/distributors).
- **B2C Direct-to-Home Ordering** (customers buy directly from local retailers).

Mission: To build the largest real-time demand & supply ecosystem across **50 Humsang districts**, serving **5M+ households**.

2. Business Objectives

1. Onboard **50,000+ businesses** (sales managers, wholesalers, retailers) across 50 districts.
 2. Serve **100,000 customers per district** (5 million households in total).
 3. Build a **digital-first supply chain** with real-time inventory visibility.
 4. Achieve **sustainable growth** through partner subscriptions, transaction fees, and value-added services.
-

3. Market Opportunity

- **Fragmented Distribution:** Small retailers and wholesalers struggle with visibility.
 - **Digital Shift:** Customers are increasingly preferring D2H for essentials and lifestyle goods.
 - **Regional Potential:** Humsang districts represent an underserved but **high-demand market** across Food & Beverages, Health & Wellness, Lifestyle, Home Décor, and Agriculture.
 - **Scalable Model:** Once successful, the model can expand to **other Indian states and pan-India**.
-

4. Target Customers

B2B (Business Partners)

- Brand Distribution Managers (as **Sales Managers**)
- Wholesale Distribution Partners (as **Wholesalers**)
- Brand Distribution Agencies (as **Retailers**)

B2C (Households)

- Direct customers seeking home delivery from verified retailers.
 - Estimated **100,000+ customers per district**.
-

5. Business Model

Revenue Streams

1. **Subscription Fees** – Paid plans for wholesalers & retailers for premium listing, analytics, and inventory tools.
 2. **Transaction Commission** – Small % fee on every B2B and B2C order.
 3. **Advertising** – Brands pay for priority placement on the app.
 4. **Logistics Fees** – Margin on last-mile delivery services.
 5. **Value-Added Services** – Financing, micro-credit, insurance for partners.
-

6. Platform Features (Website/App)

Phase 1 – Core B2B Setup

- Partner onboarding & KYC
- District-level role allocation
- Inventory management
- Orders & payments
- Shipment tracking
- Sales dashboards

Phase 2 – Business Listing Marketplace

- Verified business profiles
- Product/service listings
- Search & filter by district/category
- Inquiry & connect system
- Ratings & reviews

Phase 3 – Direct-to-Home (D2H) Expansion

- Customer ordering app
- Live stock visibility
- Digital payments
- Doorstep delivery
- Loyalty programs

Phase 4 – Growth & Scale

- AI-powered demand forecasting
 - Multi-language support
 - Financial services for SMEs
 - Expansion to new states
-

7. Operations Plan

1. **District-Level Hubs** – Wholesale stocking & logistics centers in each Humsang district.
 2. **Tech Development** – Build scalable app (Android, iOS, Web) with real-time inventory sync.
 3. **Onboarding Drive** – Partner with local businesses, associations, and entrepreneurs.
 4. **Training & Support** – Continuous partner training in app usage, sales, and logistics.
 5. **Customer Outreach** – Awareness campaigns for households about D2H service.
-

8. Marketing & Growth Strategy

- **Business Outreach:** District campaigns to recruit wholesalers/retailers.
 - **Local Advertising:** Posters, events, and radio promotions in local languages.
 - **Referral Programs:** Incentives for businesses/customers to invite others.
 - **Digital Marketing:** Social media campaigns, regional influencer partnerships.
 - **Brand Partnerships:** Tie-ups with FMCG, lifestyle, and wellness companies.
-

9. Technology Plan

- **Cloud-based system** for real-time inventory.
 - **AI/ML for demand forecasting** & supply optimization.
 - **Secure payment gateway** for both B2B and B2C.
 - **GPS-enabled logistics tracking** for deliveries.
 - **Scalable architecture** to expand beyond 50 districts.
-

10. Financial Plan (High-Level Projections)

(Estimates for Year 1 – Year 3)

- **Year 2025 (Setup & Launch):**
 - Investment: (Tech, Marketing, Warehousing, Onboarding).
 - Revenue: Minimal (focus on onboarding).
 - **Year 2026 (Marketplace Expansion):**
 - Target Revenue: (subscriptions + commissions).
 - Breakeven expected.
 - **Year 2027 (D2H Rollout):**
 - Target Revenue:
 - Profit margins:
-

11. Competitive Advantage

- **District Exclusivity:** First-mover advantage in 50 Humsang districts.
 - **Integrated Model:** B2B + B2C + Business Listings on one platform.
 - **Real-Time Inventory:** Solves one of the biggest pain points in distribution.
 - **Scalability:** Expandable beyond Humsang into other states.
-

12. Conclusion

Humsang Business is positioned to become the **largest real-time business & customer distribution network** in the Humsang region, connecting **brands → businesses → customers** seamlessly. With strong digital infrastructure, exclusive partnerships, and a clear expansion roadmap, it is not just a distribution platform but a **regional super app** for commerce.

Positioning **Humsang** like a **search engine for businesses, products, and services** in the Humsang region (and later beyond).
Instead of just being an app or marketplace, it becomes a **business discovery engine** — something like a hybrid of **Google (search) + IndiaMART (B2B) + Justdial (local listing) + Amazon (inventory + D2H)**.

Concept: Humsang as a Search Engine Business

Core Idea

Humsang is a **real-time business & product search engine** for the Humsang districts.

- Businesses list themselves → Humsang indexes them.
 - Customers or partners search → Humsang shows **live availability, location, and contact/order options**.
 - Search is not just info-based but **inventory + supply-chain integrated**.
-

How It Works (Search Engine Model)

1. **Businesses Get Indexed**
 - Wholesalers, retailers, agencies, and even service providers list themselves.
 - Listings include products, services, inventory, contact, and delivery area.
 2. **Smart Search for Users**
 - Users type: “*Rice wholesaler in Deoria*” → results show verified businesses with live stock.
 - Filters: Product category, district, price, delivery option.
 3. **Real-Time Layer**
 - Unlike Google/Justdial, Humsang shows **real-time inventory availability**.
 - Eg: “Parle-G distributor in Kushinagar → 20 cartons available today, delivery in 2 days.”
 4. **Engagement Options**
 - Contact via call/chat inside app.
 - Place bulk order directly.
 - Save suppliers/retailers as “Favorites”.
-

Search Features

- **Business Search** → Find wholesalers/retailers/brands in any district.
- **Product Search** → Find where a product is available *right now*.

- **Location Search** → Search businesses by district or pincode.
 - **Partner Search** → Businesses looking to tie up with other businesses.
 - **Customer Search** → Later, allow households to search local shops for D2H.
-

Revenue Model (Search Engine + Marketplace Hybrid)

1. **Listing Fees** – Businesses pay for verified premium listings.
 2. **Search Ads** – Sponsored results (brands & wholesalers).
 3. **Lead Commission** – Fee per lead generated (like IndiaMART).
 4. **Transaction Fees** – Small % cut on direct orders.
 5. **Logistics Integration** – Revenue from fulfillment & delivery.
-

Advantages of Search Engine Approach

- **Scalable:** Can go beyond 50 Humsang districts → all India.
 - **Sticky Platform:** People use search daily → high engagement.
 - **Trust Building:** Verified, real-time inventory makes it better than Justdial/IndiaMART.
 - **Ecosystem Ready:** Connects seamlessly with your D2H model.
-

 In one line:

Humsang = Google Search + IndiaMART + Amazon for the Humsang Region.

**Search businesses,
products & services.**
